Professional Summary

MCA student and full-stack developer experienced in building MERN applications, REST APIs, authentication systems, and AI-powered web platforms. Skilled in Java, JavaScript, React.js, Node.js, Express.js, and MongoDB, with knowledge of DSA, OOP, DBMS, operating systems, and computer networks.

Education

Jawaharlal Nehru University — **2025 – 2027**
Master of Computer Applications (MCA) | *CGPA: 7.54/9* — *New Delhi, India*

M.L.K.P.G. College — **2021 – 2024**
Bachelor of Computer Applications (BCA) | *CGPA: 8.12/10* — *Balrampur, India*

Technical Skills

Languages: Java, JavaScript, Python, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MongoDB Atlas, MySQL
Tools: Git, GitHub, Postman, Linux, VS Code
Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

MIS Assistant — **Jul 2025 – Oct 2025**
People Action for National Integration (PANI)

- Managed, cleaned, and validated **structured project datasets** using **MS Excel** and MIS tools, ensuring **data integrity** and reliable reporting.
- Prepared and presented **monthly MIS reports**, converting field data into clear insights that supported operational decision-making.
- Coordinated with farmers, CRPs, and project teams to **verify data at source** and streamline **data collection and reporting workflows**.

Projects

GenPrep AI – AI-Powered Interview Preparation Platform — Live Demo | Source Code
React.js, Express.js, Node.js, MongoDB, Gemini Flash

- Eliminated generic interview prep by engineering an **AI assessment engine with Gemini Flash**, achieving **sub-4s response latency** and **100% schema compliance** while benchmarking resumes against JDs with a **0–100% match score** and **5-day prep roadmap**.
- Hardened API security against credential attacks by engineering an Express gateway with **20 req/15-min rate limits**, a **3-attempt OTP lockout**, and automated cleanup via **MongoDB 24-hour TTL indexing**.

TransitOps – Smart Fleet Operations & Logistics Platform — Live Demo | Source Code
React, Node.js, Express.js, MongoDB Atlas, JWT, Nodemailer

- Built a **fleet management web app across 4 user roles** to coordinate trips and vehicles, adding **validation rules** that stop overloaded trucks and odometer tampering, with **live tracking** on an interactive Leaflet map.
- Created a **24-hour automated email alert system** using Nodemailer to catch expired driver licenses and block unsafe dispatches, paired with a dashboard calculating **vehicle fuel efficiency and ROI** with CSV exports.

CertChain – Decentralized Credential Verification System — Live Demo | Source Code
Solidity, Ethereum Sepolia, React.js, Node.js, Express.js, MongoDB

- Built a **tamper-proof credential verification platform** using Solidity and Node.js, anchoring **SHA-256 hashes on Ethereum** for **instant (<1s), zero-gas verification** while **cutting on-chain storage costs by 99%**.
- Engineered a secure issuance pipeline in React and Express with **QR-coded PDF generation** and **AES-256 encrypted IPFS backups**, ensuring **100% tamper detection** and student data privacy.

Certifications

- Software Engineer Certificate – HackerRank — Credential
- Software Engineer Intern Certificate – HackerRank — Credential
- Machine Learning Summer Training – Analytics Vidhya — Credential
