Vivek Shukla

Balrampur, Uttar Pradesh, India | +91-7800652515 | vivek25tech@gmail.com
GitHub | LeetCode | GfG | Portfolio | LinkedIn | Medium

Summary

MCA student with hands-on experience in full-stack development using the MERN stack (React.js, Node.js, Express.js, MongoDB) and Python. Familiar with Data Structures & Algorithms, OOP, REST API design, authentication, and building AI-integrated applications using the Gemini API. Interested in solving real-world engineering problems through practical software development.

Education

Jawaharlal Nehru University, New Delhi 2025 – 2027
Master of Computer Applications (MCA), CGPA: 7.54 / 9

M.L.K.P.G. College, Balrampur Sep 2021 – May 2024
Bachelor of Computer Applications (BCA), CGPA: 8.12 / 10

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **AI / Machine Learning:** Machine Learning fundamentals, Generative AI, LLM Integration, Gemini API
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, VS Code, Postman
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

Gen-AI Interview Platform GitHub
React.js, Node.js, Express.js, MongoDB, Gemini API, JWT

- Designed and built a multi-step LLM pipeline from scratch (resume analysis → personalized question generation → feedback → preparation plan) using the Gemini API, chaining prompts so each stage's output conditions the next, rather than a single-shot prompt.
- Built reusable backend modules, REST APIs, and JWT authentication for dynamic AI interview generation.

AI Job Recommendation System GitHub
Python, SWI-Prolog, PySwip

- Developed a rule-based AI job recommendation system from scratch using Python and SWI-Prolog to match candidate profiles with suitable job roles.
- Implemented reusable rule-based modules and matching logic to generate reliable job recommendations.

TransitOps — Smart Transport Operations Platform GitHub
React.js, Node.js, Express.js, MongoDB, JWT

- Developed and maintained software modules for a full-stack fleet management platform using the MERN stack.
- Implemented JWT Authentication, Role-Based Access Control, and business rule validation for secure operations.
- Built REST APIs supporting fleet operations, authentication, and business workflows.

Experience

MIS Assistant — People Action for National Integration (PANI) *Jul 2025 – Oct 2025*

- Managed and validated project datasets using MS Excel and MIS tools to ensure data accuracy and reliability.
- Collaborated with cross-functional teams to validate data, improve reporting workflows, and ensure data quality for operational decision-making.

Certifications

- Software Engineer Certificate — HackerRank (Link)
- Software Engineer Intern Certificate — HackerRank (Link)
- Machine Learning Summer Training — Analytics Vidhya (Link)
